PROFESSIONAL SUMMARY

Software Engineering graduate and MBA in Artificial Intelligence & Business Analytics with hands-on experience in quality control, data-centre testing and operational leadership. Builds automated UI and API tests, SQL-based dashboards, data controls and AI-assisted workflows. Recent QualityPulse project uses Playwright, TypeScript, REST API testing and GitHub Actions to deliver 12 automated checks with published execution evidence. Seeking QA Automation, Test Engineering, Business/Data Analysis or Process Automation opportunities in English-speaking teams.

CORE COMPETENCIES

QA automation | UI and API testing | Test design | Negative-path validation | CI/CD | Data analysis | KPI reporting | Dashboard requirements | SQL | Data validation | Process mapping | Requirements analysis | Root-cause analysis | Quality assurance | AI governance | Stakeholder communication

TECHNICAL SKILLS

Testing & QA: Playwright, TypeScript, Selenium, PyTest, Postman, REST API testing, PHPUnit, defect reporting, GitHub Actions, CI/CD

Data & Analytics: SQL, PostgreSQL, MySQL, Microsoft Excel, Supabase, data cleaning, aggregation, KPI analysis, dashboard design

Automation & AI: Python (academic and personal projects), Google Sheets, Apps Script, Google AI Studio, Gemini API, prompt engineering, AI governance

Development & Methods: Java, Kotlin, JavaScript, PHP, Node.js, HTML/CSS, Git/GitHub, Jira, Agile/Scrum, technical documentation

SELECTED PROJECTS

QualityPulse - QA Intelligence Platform | Personal Project | 2026

[Live dashboard](#) | [GitHub repository](#)

- Built a controlled e-commerce test environment with seven Chromium UI scenarios and five REST API tests using Playwright and TypeScript.
- Automated type checking, browser installation, test execution, HTML reporting and GitHub Pages deployment through GitHub Actions.
- Published a live quality dashboard showing 12/12 passing tests, layer coverage, scenario duration and traceable execution evidence.

Revenue Guard - Customer Retention Analytics | MBA Capstone | 2026

- Designed an executive analytics solution for recurring revenue, churn risk, customer health and portfolio prioritisation using PostgreSQL, Supabase and TypeScript.
- Applied SQL views, row-level security, controlled metrics and AI-assisted recommendations with mandatory human approval and an audit trail.

Aurora - Accounts Payable Automation | MBA Applied Project | 2026

- Automated extraction, validation and classification of 494 accounting records using Google Sheets, Apps Script and generative AI.
- Defined business rules, exception handling and management reporting to improve consistency and preserve audit evidence.

Dental Clinic Management System | Software Engineering Project | 2025

- Built a role-based PHP/MySQL web application for patient records, scheduling, procedures and email reminders.
- Implemented PHPUnit tests and usability testing, achieving a SUS score of 78/100 and applying findings to improve the user experience.

PROFESSIONAL EXPERIENCE

Warehouse Supervisor | A2Global Electronics + Solutions | Hoofddorp, Netherlands

Sep 2025 - Present

- Supervise daily warehouse operations, workflow priorities and team coordination in a time-critical international electronics environment.
- Use operational records and quality information to identify issues, maintain process discipline and support accurate, on-time execution.
- Coordinate issue resolution and communicate priorities across warehouse, quality and stakeholder teams.

Quality Control Inspector | A2Global Electronics + Solutions | Hoofddorp, Netherlands

Apr 2022 - Aug 2025

- Inspected electronic products against customer specifications and documented quality results, discrepancies and traceability information.
- Investigated non-conformities, supported corrective actions and improved consistency across operational processes.

Warehouse Operator | Nissan Motor Corporation | Netherlands

May 2019 - Apr 2022

- Performed picking, packing, receiving, storage and shipping while maintaining inventory accuracy and delivery-quality standards.
- Supported stock control, team coordination and continuous-improvement activities in a high-volume logistics operation.

Data Centre QA / Server Hardware Tester | Material in Motion - Google Programme | Netherlands

Oct 2017 - May 2019

- Tested and quality-checked server hardware for Google data-centre environments using controlled procedures and technical standards.
- Documented results, verified component traceability and escalated defects to protect product reliability and process compliance.

Production Lines Manager / Team Leader | Kaffa Cafes | Portugal

Jul 2015 - Aug 2017

- Managed a production-line team, maintained quality standards and coordinated scheduling, training and process efficiency.

EDUCATION

MBA in Artificial Intelligence and Business Analytics | UNIGRAN | Completed Sep 2026

Business analytics, data-driven decision-making, AI strategy, predictive analytics, dashboard design, prompt engineering, process automation and AI governance.

Bachelor's Degree in Software Engineering | UNIGRAN | Completed Jun 2025

Software design, databases, requirements analysis, software testing, web and mobile development, programming logic and Agile delivery.

CERTIFICATIONS & TRAINING

Quality Audits - Instructions and Key Details (2026) | Big Data Fundamentals 3.0 | Kotlin Development Bootcamp (2024) | Java Developer Bootcamp
