

HUGO PAULO

QA AUTOMATION | AI QUALITY | BUSINESS ANALYTICS

Purmerend, Netherlands | Open to English-speaking teams

Portfolio: <https://hugomanuelpaulo.github.io> | GitHub: github.com/HugoManuelPaulo

LinkedIn: [linkedin.com/in/hugomanuelpaulo](https://www.linkedin.com/in/hugomanuelpaulo)

PROFILE

Quality professional and Software Engineering graduate combining 5+ years of quality and process improvement with hands-on QA automation, API testing, AI assurance and business analytics. Builds traceable controls, automated release evidence and dashboards that support decisions.

LANGUAGES

Portuguese: Native | English: Fluent | Dutch: A2 - Elementary working proficiency

CORE SKILLS

Testing: Playwright, Selenium, PyTest, Postman, REST APIs, test design, defect reporting

AI Quality: LLM evaluation, prompt-injection testing, PII controls, grounding, AI governance

Data: SQL, PostgreSQL, MySQL, Excel, KPI analysis, dashboards, data validation

Engineering: Python, FastAPI, TypeScript, JavaScript, PHP, GitHub Actions, Docker, CI/CD

SELECTED TECHNICAL PROJECTS

AI Quality & Compliance Command Center | 2026

- Built a versioned 20-scenario evaluation harness and FastAPI service for AI release control.
 - Tests grounding, prompt injection, PII leakage, transparency, human oversight and latency.
 - Evidence: 18/20 passed, 0 critical/high findings, 2 medium findings, release gate PASS.
 - Built Python AI Red Team Arena with 12 scored challenges.
- github.com/HugoManuelPaulo/ai-quality-command-center

QualityPulse - Quality Intelligence Platform | 2026

- Automated browser UI and REST API testing with Playwright and TypeScript.
 - Evidence: 12/12 scenarios passed; live dashboard and report published by CI/CD.
- hugomanuelpaulo.github.io/qualitypulse/

QA Automation Portfolio | 2026

- E-commerce framework covering login, search, cart, checkout and APIs.
 - Evidence: 20/20 scenarios passed with screenshots, reports and GitHub Actions.
- github.com/HugoManuelPaulo/qa-automation-portfolio

Revenue Guard - Customer Retention Analytics | 2026

- Modeled 24 months across 7 portfolios using controlled SQL views and access rules.
- Delivered executive retention metrics with validation and traceability evidence.

HUGO PAULO | PROFESSIONAL EXPERIENCE

Warehouse Supervisor | A2Global Electronics | Sep 2025 - Present

- Coordinate operations, traceability, discrepancy handling and process improvement.
- Support reliable execution in an international electronics environment.

Quality Control Inspector | A2Global Electronics | Apr 2022 - Aug 2025

- Inspected products and processes, maintained quality records and handled non-conformities.
- Used documented evidence and root-cause thinking to protect quality standards.

Warehouse Operator | Nissan Motor Corporation | May 2019 - Apr 2022

- Maintained order and inventory accuracy in a high-volume logistics operation.
- Contributed to continuous-improvement activities and controlled material flows.

Data Centre QA / Server Hardware Tester | Material in Motion | Oct 2017 - May 2019

- Tested server hardware for the Google programme under controlled procedures.
- Documented results, verified traceability and escalated technical defects.

Production Lines Manager / Team Leader | Kaffa Cafes | Jul 2015 - Aug 2017

- Led production staff, scheduling and training while maintaining quality standards.
- Improved workflow coordination and operational efficiency.

EDUCATION

MBA - Artificial Intelligence & Business Analytics | Completed Sep 2026

Applied focus: analytics, automation, AI governance and measurable business controls.

B.Sc. Software Engineering | UNIGRAN | 2025

Projects in web development, Android, databases, testing and software quality.

ADDITIONAL PROJECTS

Aurora Accounts Payable | Process Automation | 2026

Validated 494 accounting records, flagged exceptions and retained auditable evidence.

Dental Appointment Management | Full-stack Web | 2025

Role-based PHP/MySQL application for records, scheduling, procedures and reminders.

BMI Calculator | Native Android | 2024

Kotlin application with XML layouts, validation and multi-activity result flow.

WORKING STYLE

Evidence-driven | Quality-focused | Structured problem solving | Continuous improvement
Cross-functional communication | Operational ownership | International environment
