

HUGO PAULO

QA AUTOMATION | SOFTWARE QUALITY | DATA ANALYTICS

Purmerend, Netherlands | hugomanuelpaulo@gmail.com
linkedin.com/in/hugomanuelpaulo | github.com/HugoManuelPaulo

PROFESSIONAL SUMMARY

Software Engineering graduate with an MBA in Artificial Intelligence and Business Analytics, building practical QA automation and data solutions. Hands-on portfolio experience with Selenium, Playwright, PyTest, Postman, REST API testing and GitHub Actions. Brings 5+ years of quality control, traceability, defect handling and process-improvement experience from international production and technology environments.

LANGUAGES

Portuguese Native **English** Professional working proficiency **Dutch** A2 - elementary

Currently improving Dutch; targeting English-speaking or international teams.

CORE SKILLS

Testing & QA: Selenium, Playwright, PyTest, Postman, REST APIs, test design, defect reporting

Automation: Python, TypeScript, JavaScript, GitHub Actions, CI/CD fundamentals

Data & BI: SQL, PostgreSQL, MySQL, Excel, KPI dashboards, data validation, Supabase

Development: Kotlin, Java, PHP, HTML/CSS, Git/GitHub, Agile/Scrum, Jira

SELECTED TECHNICAL PROJECTS

QualityCart - E-commerce QA Automation

2026

- Built a Python, Selenium and PyTest framework using Page Object Model for login, product search, cart, quantity and checkout journeys.
- Implemented REST API contract, negative and data-driven tests for products and orders; 20/20 automated scenarios pass in CI.
- Added GitHub Actions, HTML reports, failure screenshots, Postman checks and a public live results dashboard.

QualityPulse - QA Intelligence Platform

2026

- Automated controlled e-commerce UI and REST API checks with Playwright and TypeScript; publishes live execution evidence through CI/CD.
- Demonstrates 12/12 passing scenarios across two testing layers with a public dashboard and report.

Live: hugomanuelpaulo.github.io/qualitypulse/

Revenue Guard - Executive Retention Analytics

2026

- Developed an executive dashboard from 24 months of revenue data using PostgreSQL, Supabase, controlled views and access rules.
- Applied validation gates, churn and MRR KPIs, audit evidence and role-based data access; academic evaluation: 92%.

PROFESSIONAL EXPERIENCE

Warehouse Supervisor | A2Global Electronics

Sep 2025 - Present

- Coordinate daily warehouse operations, priorities and team activities in an international electronics environment.
- Maintain traceability, manage discrepancies and support continuous process improvement and reliable order flow.

Quality Control Inspector | A2Global Electronics

Apr 2022 - Aug 2025

- Performed product and process inspections, maintained quality documentation and handled non-conformities.
- Applied evidence-based controls, defect escalation and traceability procedures to protect output quality.

Warehouse Operator | Nissan Motor Corporation

May 2019 - Apr 2022

- Handled orders and inventory in a high-volume logistics environment while supporting accuracy and continuous improvement.

Data Centre QA / Server Hardware Tester | Material in Motion

Oct 2017 - May 2019

- Tested server hardware for the Google programme using controlled technical procedures and acceptance criteria.
- Documented results, verified component traceability and escalated detected hardware defects.

Production Lines Manager / Team Leader | Kaffa Cafes

Jul 2015 - Aug 2017

- Led production-line staff and coordinated quality standards, scheduling, training and process efficiency.

EDUCATION

MBA - Artificial Intelligence & Business Analytics

Completed Sep 2026

UNIGRAN | Analytics, automation, AI governance and measurable business controls

B.Sc. - Software Engineering

2025

UNIGRAN | Web development, Android, databases, testing and software quality

ADDITIONAL PROJECTS & TRAINING

- Aurora Distribuidora data audit: validated 494 accounting records, removed 33 duplicates, blocked 59 exceptions and produced 402 auditable entries.
- Dental Clinic Management System: full-stack project with PHP/PHPUnit tests and a System Usability Scale result of 78/100.
- Quality Audits - Instructions and Key Details certificate (2026); Kotlin bootcamp (2024).

WORK PREFERENCES

Open to QA Automation, Test Engineer, Data/Business Analyst and Process Automation roles in English-speaking international teams. Based in Purmerend and available for hybrid or remote opportunities.
